

ERRATUM

Correction to “Fitwits™ Leads to Improved Parental Recognition of Childhood Obesity and Plans to Encourage Change”

In the above-mentioned article,¹ the electronic version differs from the print version due to a numeric error in Table 4. While the nearby text above the table does use the correct number (23) [proportionate hand-based portion sizes (n = 23)]; Table 4 reads “3” rather than “23” in the third row, first column under *Eat healthier portion sizes*. The electronic version on the *Journal of the American Board of Family Medicine* website has been corrected. We apologize for the error, and we regret any confusion or inconvenience it may have caused.
