

Content Usage and the Most Frequently Read Articles of 2017

Phil Lupo, MLIS, Anne Victoria Neale, PhD, MPH, Marjorie A. Bowman, MD, MPA, and Dean Seebusen, MD, MPH

2017 was the 30th year of print and 15th year of online publication of the *Journal of the American Board of Family Medicine (JABFM)*. Here we provide our annual report of articles published in 2017 that were of greatest interest to our readers. Table 1 shows the 3 most frequently read articles by issue in 2017. Once again, original research proves to be the most-read type of article.

In addition, we provide an update on the content usage statistics over the past 8 years. Figure 1 illustrates the number of total access events for *JABFM* content from 2010 to 2017. The year 2017 was the busiest year for online usage activity in *JABFM*'s history, with an average of 772,473 content usage requests a month, and a total of 9.26 million during the year. Content activity was up 25% in 2017 compared with content usage requests during 2016 and, when compared with 2010, we note a 274% increase. Full-text articles were the most accessed during 2017, with an average of 265,793 monthly requests, followed by abstracts, with 226,846 average monthly requests, and then PDF articles, with 155,010 average monthly requests.

As always, we welcome reader feedback about published articles. Comments about specific articles can be posted to the *JABFM* Web site (www.jabfm.org) by selecting "Responses" to the right of the article text. Letters to the editor can also be submitted for peer review and publication using the author portal.
