If you're a family physician looking for a professional life that keeps you attuned to high-tech medical advances and offers you financial rewards, opportunities for career development, excellent benefits and world travel, the Navy Medical Corps may be for you. As a Navy physician, you'll practice in a collegial environment where physicians support each other. You'll be a commissioned officer and a respected member of the Navy's prestigious health care delivery team.

You'll work in clinical settings in the United States and around the world with top professionals and state-of-the-art equipment and facilities. Through funded continuing education and specialty training, you'll have the opportunity to develop your full professional potential as well as the freedom to move from practice to research or teaching without losing seniority, salary level or retirement benefits.

You'll earn an excellent starting salary based on your credentials and years of experience, and federal law provides free medical liability protection to Navy physicians. You may also be entitled to special pay in addition to your regular salary and allowances. Navy benefits include 30 days of paid vacation earned each year, free medical and dental care, tax-free housing and food allowance, an excellent retirement system and opportunities for free travel to some of the most exotic and beautiful places in the world.

For more information, contact your local Navy Medical Programs officer, or if you'd like to talk to a Navy physician, call 1-800-USA-NAVY. Ask for operator 10.

ZIAC® (Bisoprolol Fumarate and Hydrochlorothiazide) Tablets

For full prescribing information, please consult package insert.

DESCRIPTION
ZIAC® (bisoprolol fumarate and hydrochlorothiazide) is indicated for the treatment of hypertension. It contains two antihypertensive agents in a once-daily dosage: a synthetic beta-blocker (carboxylic acid) and a benzothiazide diuretic (thiazide).

CLINICAL PHARMACOLOGY
At doses ≥20 mg bisoprolol fumarate inhibits beta-adrenoceptors located in bronchial and vascular muscle, decreasing increased heart rate, without affecting the vasodilator effect of other antihypertensive agents used concurrently.

WARNINGS
Beta-blockers should be used in patients with peripheral vascular disease.

Bisoprolol: For patients with a history of cardiac failure, consideration should be given to use of beta-blockers in the management of heart failure.

Beta-blockers may be required. Other antihypertensive agents may be required. Other antihypertensive agents may be required.

Other antihypertensive agents may be required. Other antihypertensive agents may be required.
