# Physician Quality Reporting Initiative (PQRI) – 2009 Update

Last year the Center for Medicare and Medicaid Services (CMS) approved the American Board of Family Medicine (ABFM) Performance in Practice Registry as one of 32 qualified registries that may submit Physician Quality Reporting Initiative (PQRI) data to CMS on behalf of its Diplomates. The Medicare, Medicaid, and SCHIP Extension Act of 2007 (MMSEA) authorized CMS to make PQRI incentive payments for satisfactory reporting of quality measures data in 2008. It also established

alternative reporting periods and criteria for the reporting of measure groups and for the reporting of PQRI quality measures through an approved clinical data registry.

In 2008, 382 ABFM Diplomates participated in the initiative, which was made available in September. The ABFM has continued as a PQRI registry participant in 2009. In addition to the Diabetes Module, a Preventive Care Module will be added in May 2009.

This year, physicians who meet the criteria for satisfactory submission of quality measures data for 30 consecutive patients earn an incentive payment of 2.0% (up from 1.5% in 2008) of their total allowed charges for Physician Fee Schedule (PFS)-covered professional services furnished during the reporting period, January 1, 2009, through December 31, 2009 (the 2009 calendar year). Unlike last year, physicians will not have the option of a 6-month reporting period. For 2009, the only reporting period will be January 1 through December 31, 2009. CMS approved financial incentives earned during 2009 reporting are scheduled to be paid in mid-2010 from the Federal Supplementary Medical Insurance (Part B) Trust Fund.

In addition, a new measure, measure number 163, has been added to the Diabetes Mellitus mea-

asures group for 2009. All measures are listed in Tables 1 and 2.

The modules may be accessed without fee for use in participating in PQRI. However, Diplomates who are participating in Maintenance of Certification for Family Physicians (MC-FP) and elect to complete this module to receive Part IV credit are required to submit the appropriate MC-FP processing fee.
