

Content Usage and the Most Frequently Read Articles by Issue in 2011

Phillip Lupo, Jr, MLIS, Anne Victoria Neale, PhD, MPH, and Marjorie A. Bowman, MD, MPA (*J Am Board Fam Med* 2012;25:266–269.)

We are pleased to provide feedback about the *Journal of the American Board of Family Medicine* (JABFM) articles published in 2011 that were of the greatest interest to our readers. Table 1 shows the 3 most frequently read articles by issue in 2011. Original research and clinical reviews proved to be the most-read type of article.

In addition, we provide an update on the usage statistics of our content over the last 6 years. Figure 1 illustrates the number of total access

events for JABFM content from 2006 to 2011. With an average of 240,000 monthly and a total of 2.89 million yearly content usage requests, 2011 was the busiest year for online usage activity in JABFM's history. Content activity was up 17% in 2011 compared with content usage requests during 2010, and when compared with 2006, a 291% increase is noted. Abstracts were the most accessed during 2011, with an average of 82,349 monthly requests; followed closely by full-text HTML articles, with 82,266 average monthly requests; and then PDFs, with 50,926 average monthly requests.

As always, we welcome reader feedback about published articles. Comments about specific arti-

Rankings are based on hits received by articles archived on the *Journal of the American Board of Family Medicine* website only. Accessed 23 February 2012.

cles can be posted to the *JABFM* website by clicking on "Responses" in the middle column of the article.

We would also like to mention that in October 2011, we launched a new *JABFM* website for our readers. To quote from our new site, "the user interface is a flexible 3-column design that places many features at your service without tak-

ing attention away from the substantive page content. Features most closely associated with the page content are placed closest to it. A major goal of the design is to keep you in context as you conduct your research."¹ We hope that you find our new layout informative and easy to use and we welcome any suggestions to improve its usability.
