

## ERRATA

### Correction to “Does the ‘Office Nurse’ Level of Training Matter in the Family Medicine Office?”

---

In the above-mentioned article,<sup>1</sup> In Table 3, Patient Satisfaction Scores, for the Inclusion of obstetrics–Included row under column 1 (Group), the value of the adjusted odds ratio in column 4 should be 1.56, not 1.00. The confidence interval of 1.27–1.93 is correct as published. The electronic version on the *Journal of the American Board of Family Medicine* website has been corrected. We apologize for the error, and we regret any confusion or inconvenience it may have caused.

### Correction to “Satisfaction of Family Physicians Working in Community Health Centers”

---

In the above-mentioned article,<sup>1</sup> there is an error in the results section of the abstract. The proportions of family physicians highly satisfied with their employers is reported as 32% versus 39%, but it should be the same as what is reported in Table 3 (62% vs 72%). The electronic version on the *Journal of the American Board of Family Medicine* website has been corrected. We apologize for the error, and we regret any confusion or inconvenience it may have caused.
