CLASSIFIED ADVERTISING

Classified advertising orders, correspondence and payments should be directed to: JABFP, Classified Advertising, 1440 Main Street, Watertown, MA 02154.

Classified advertisements placed with JABFP are restricted to physician recruitment, faculty positions, CME courses/seminars and practices for sale. All ads must relate to the medical field and are subject to approval.

Please refer to the schedule below for closing dates. Classified rate is $1.40 per word (minimum charge of $75.00 per ad insertion) and $95.00 per column inch for classified display ads. Prepayment in full is required with all classified advertising. We accept American Express, Visa or MasterCard. Confidential reply boxes are an additional $10.00 per insertion. Responses are sent directly every Tuesday and Thursday and the box will remain open for three months.

All advertisements for employment must be nondiscriminatory and comply with all applicable laws and regulations. Ads that discriminate against applicants based on sex, age, race, religion, marital status or physical handicap will not be accepted.

NOTE: Our classified advertisements are all set in the same typeface and format. All ads are highlighted by geographic territory.

For more information please call (800) 635-6991 (outside MA), (617) 893-3800 (in MA). Fax # (617) 893-5003.

PACIFIC

ASSOCIATE DIRECTOR, FAMILY PRACTICE RESIDENCY PROGRAM—La Grange Memorial Hospital (La Grange, IL), a 274-bed, Level II trauma care center, invites family practice physicians to apply for faculty position in only residency program in hospital. Prefer private practice experience, residency and or teaching experience and active obstetrics interest. La Grange Memorial Hospital is a member of a small, progressive hospital system providing services to a three county area in west suburban Chicago. Direct inquiries with CV to Lucille Skuteris, Director of Physician Relations, 5101 S. Willow Springs Road, La Grange, IL, 60525, or call 1-800-325-2014.

FAMILY PHYSICIAN—for Assistant Director position in Cedar Rapids Family Practice Residency, Cedar Rapids, Iowa. Interest in obstetrics required; writing or research is encouraged with adequate time and support available. Full range of faculty responsibilities including clinical teaching, patient care and administration; a cooperative approach to decision-making and planning. Ideal candidate will be family practice residency-trained and ABFP certified/eligible. Residency jointly sponsored by two community hospitals with 900 beds, 24 residents and no competing residencies. Strong philosophical and financial support from hospitals and medical community. Fully accredited by ACGME, operational since 1971. Excellent salary and benefits: creative and challenging environment. Send Inquiries to: Curtis L. Reynolds, M.D., Director, Cedar Rapids Medical Education Program, 1026 A Avenue NE, Cedar Rapids, IA 52402.
Many physicians are finding it difficult to keep current on the effectiveness and safety of prescribed products.

Drug Therapy, Volume 8 can help you review changes in drug use, the implications of using drugs in combination, and the comparative efficacy of different drugs.

Drug Therapy, Volume 8 includes 24 review articles originally published in the New England Journal of Medicine from 1985 to 1990, plus related Correspondence and Addenda by the original authors, providing updates from new research and clinical experience.

Drug Therapy, Volume 8 © 1991. Edited by John A. Oates, M.D. and Alastair J.J. Wood, M.D., Department of Medicine, Vanderbilt University School of Medicine 300 pages, including index and over 75 charts & illustrations.

CONTENTS:

It's the Journal of the American Board of Family Practice. Where you reach the best job candidates in Family Practice. More of them. More often. To find out more, just contact Classified Advertising at (617) 893-3800.
From the publisher of the first clinical studies on AIDS

Comes the latest reprint collection on this important topic.

In the coming years, you and thousands of physicians like you will be providing—often for the first time—primary care for AIDS patients.

AIDS: Epidemiologic and Clinical Studies, Volume II can help you diagnose, evaluate and treat these patients.

This second volume in the Reprint Collection Series includes 63 original articles, published from February 1987 to February 1989, in The New England Journal of Medicine. These articles, along with editorial, correspondence and critical responses from practitioners in the field, provide a unique perspective for clinical understanding of Acquired Immunodeficiency Syndrome, its cause, characteristics, treatment, and public health implications.

Articles of particular interest:
- A study of the prevalence of HIV in teenagers and young adults.
- New retrovirus, HIV-2, and the need for seroepidemiologic surveillance.
- Methods of diagnosing opportunistic infections.
- Clinical therapy trials of the drug azidothymidine (AZT).

**DOSAGE AND ADMINISTRATION**

**Objects of Therapy:** All patients who are being treated with TENOVAR should be advised of the signs and symptoms of overdosage, the dangers of overdosage, and the importance of seeking medical advice if any of those symptoms occur. In addition, the patient should be warned about the possibility of serious and/or life-threatening conditions, such as acute pancreatitis or severe muscle pain, and the importance of reporting them to their physician promptly.

**Contraindications:**

- **Acute pancreateatitis,** peritonitis.
- **Severe arterial ischemia,** such as acute occlusion of a major artery.
- **Severe aortic stenosis,** such as acute occlusion of a major artery.
- **Severe pulmonary hypertension,** such as acute occlusion of a major artery.
- **Severe mitral stenosis,** such as acute occlusion of a major artery.
- **Severe aortic insufficiency,** such as acute occlusion of a major artery.
- **Severe mitral regurgitation,** such as acute occlusion of a major artery.
- **Severe pulmonic stenosis,** such as acute occlusion of a major artery.
- **Severe pulmonic insufficiency,** such as acute occlusion of a major artery.
- **Severe tricuspid stenosis,** such as acute occlusion of a major artery.
- **Severe tricuspid regurgitation,** such as acute occlusion of a major artery.
- **Severe right ventricular outflow tract obstruction,** such as acute occlusion of a major artery.
- **Severe left ventricular outflow tract obstruction,** such as acute occlusion of a major artery.
- **Severe left ventricular hypertrophy,** such as acute occlusion of a major artery.
- **Severe left atrial hypertension,** such as acute occlusion of a major artery.
- **Severe right atrial hypertension,** such as acute occlusion of a major artery.
- **Severe pulmonary hypertension,** such as acute occlusion of a major artery.
- **Severe left ventricular failure,** such as acute occlusion of a major artery.
- **Severe right ventricular failure,** such as acute occlusion of a major artery.
- **Severe pulmonary edema,** such as acute occlusion of a major artery.
- **Severe myocardial ischemia,** such as acute occlusion of a major artery.
- **Severe pericardial effusion,** such as acute occlusion of a major artery.
- **Severe pericardial tamponade,** such as acute occlusion of a major artery.
- **Severe cardiac tamponade,** such as acute occlusion of a major artery.
- **Severe aortic regurgitation,** such as acute occlusion of a major artery.
- **Severe mitral regurgitation,** such as acute occlusion of a major artery.
- **Severe tricuspid regurgitation,** such as acute occlusion of a major artery.
- **Severe left ventricular outflow tract obstruction,** such as acute occlusion of a major artery.
- **Severe left ventricular hypertrophy,** such as acute occlusion of a major artery.
- **Severe right ventricular outflow tract obstruction,** such as acute occlusion of a major artery.
- **Severe right ventricular hypertrophy,** such as acute occlusion of a major artery.
- **Severe left atrial hypertension,** such as acute occlusion of a major artery.
- **Severe right atrial hypertension,** such as acute occlusion of a major artery.
- **Severe pulmonary hypertension,** such as acute occlusion of a major artery.
- **Severe left ventricular failure,** such as acute occlusion of a major artery.
- **Severe right ventricular failure,** such as acute occlusion of a major artery.
- **Severe pulmonary edema,** such as acute occlusion of a major artery.
- **Severe myocardial ischemia,** such as acute occlusion of a major artery.
- **Severe pericardial effusion,** such as acute occlusion of a major artery.
- **Severe pericardial tamponade,** such as acute occlusion of a major artery.
- **Severe cardiac tamponade,** such as acute occlusion of a major artery.
- **Severe aortic regurgitation,** such as acute occlusion of a major artery.
- **Severe mitral regurgitation,** such as acute occlusion of a major artery.
- **Severe tricuspid regurgitation,** such as acute occlusion of a major artery.
- **Severe left ventricular outflow tract obstruction,** such as acute occlusion of a major artery.
- **Severe left ventricular hypertrophy,** such as acute occlusion of a major artery.
- **Severe right ventricular outflow tract obstruction,** such as acute occlusion of a major artery.
- **Severe right ventricular hypertrophy,** such as acute occlusion of a major artery.
- **Severe left atrial hypertension,** such as acute occlusion of a major artery.
- **Severe right atrial hypertension,** such as acute occlusion of a major artery.
- **Severe pulmonary hypertension,** such as acute occlusion of a major artery.
- **Severe left ventricular failure,** such as acute occlusion of a major artery.
- **Severe right ventricular failure,** such as acute occlusion of a major artery.
- **Severe pulmonary edema,** such as acute occlusion of a major artery.
