The Journal of the American Board of Family Practice
Classified advertising orders, correspondence and payments should be directed to: JABFP, Classified Advertising, 1440 Main Street, Waltham, MA 02154.

Classified advertisements placed with JABFP are restricted to physician recruitment, faculty positions, CME courses/seminars, and practices for sale. All ads must relate to the medical field and are subject to approval. Please refer to the schedule below for closing dates. Classified rate is $1.40 per word (minimum charge of $75.00 per ad insertion) and $95.00 per column inch for classified display ads. Prepayment in full is required with all classified advertising. We accept American Express, VISA, or MasterCard. Confidential reply boxes are an additional $10.00 per insertion. Responses are sent directly every Tuesday and Thursday and the box will remain open for three months.

All advertisements for employment must be nondiscriminatory and comply with all applicable laws and regulations. Ads that discriminate against applicants based on sex, age, race, religion, marital status or physical handicap will not be accepted.

NOTE: Our classified advertisements are all set in the same typeface and format. All ads are highlighted by geographic territory.

For more information please call (800) 635-6991 (outside MA), (617) 893-3800 (in MA). Fax # (617) 893-5003.

### MIDWEST

Are you prepared to deal with the medical/legal complexities of modern health care?

It would be difficult to find a better guide to this complicated and controversial topic than William J. Curran's, *Law-Medicine Notes: Progress in Medicolegal Relations*.

As one of the nation's foremost medico-legal authorities, he has been instrumental in shaping almost every medical/legal issue of the last twenty-five years, from the right to die to standards for committing mental patients.

Now, in this annotated collection of essays drawn from his column in the *New England Journal of Medicine*, Curran gives us a unique opportunity to explore the complexities of the medical/legal relationship.

*Law-Medicine Notes: Progress in Medicolegal Relations*
William J. Curran

Collected and annotated, with a preface by Arnold S. Relman, M.D., and an Introduction by the author. 450 pages. Softcover. $38.50.

**Chapter 1: Medical malpractice**  
Good Samaritan laws... peer-review programs... informed consent... clinical experimentation... diagnostic errors.

**Chapter 2: Hospitals: the new legal doctrines**  
Liability for quality of care... malpractice arbitration... conditional medical treatment... cost-containment.

**Chapter 3: Forensic medicine and the law**  
Scientific evidence and the courts... damage suits... personal-injury law and lawyers... mass disasters.

**Chapter 4: Insanity, psychiatry, and the armor of the law**  
Proof of mental illness for commitment... confidentiality in psychiatric practice... competency of the mentally retarded.

**Chapter 5: Ethics in medical practice**  
Compulsory drug testing... confidentiality in epidemiologic investigations... care for the dying... the patient's bill of rights.

**Chapter 6: Legal/moral problems in human reproduction**  
Birth control and privacy... abortion... sterilization of the poor... fetal research... the thalidomide tragedy.

**Chapter 7: Life and death**  
The uniform anatomical gift act... brain death... legal and medical death... the right to die.

Please send me ____________ copies of William J. Curran's, *Law-Medicine Notes: Progress in Medicolegal Relations*.

Allow four to six weeks for delivery.
From the publisher of the first clinical studies on AIDS comes the latest reprint collection on this important topic.

In the coming years, you and thousands of physicians like you will be providing—often for the first time—primary care for AIDS patients.

**AIDS: Epidemiologic and Clinical Studies, Volume II** can help you diagnose, evaluate and treat these patients.

This second volume in the Reprint Collection Series includes 63 original articles, published from February 1987 to February 1989, in *The New England Journal of Medicine*. These articles, along with editorial, correspondence and critical responses from practitioners in the field, provide a unique perspective for clinical understanding of Acquired Immunodeficiency Syndrome, its cause, characteristics, treatment, and public health implications.

Articles of particular interest:
- A study of the prevalence of HIV in teenagers and young adults.
- New retrovirus, HIV-2, and the need for seroepidemiologic surveillance.
- Methods of diagnosing opportunistic infections.
- Clinical therapy trials of the drug azidothymidine (AZT).

The New England Journal of Medicine
Drug Interactions: Catecholamine-depleting drugs may have additive effects when given with β-blockers. Observe patients treated with both agents closely for evidence of marked Bradycardia or hypotension which may present as vertigo, syncope, presyncope, or orthostatic changes in blood pressure without compensatory tachycardia. Exaggerated hypotensive responses have been reported from use of β-adrenergic antagonists with α-adrenergic stimulants, including those in OTC cold relief preparations. Lung disease and other obstructive anti-inflammary drugs may blunt antihypertensive effects of beta-blockers.

Carcinogenesis, Mutagenesis, Impairment of Fertility: Chronic oral toxicity studies in rats and mice, at doses 15 times (rat) and 40 times maximum recommend human dose. This did not indicate carcinogenic potential for SECTRAL. Diacetol, the major metabolite, was, in vitro, without carcinogenic potential in rats at doses up to 1800 mg/kg/day. SECTRAL and diacetol also have not shown teratogenic potential in the Ames Test. No significant impact on reproductive performance or fertility was found in rats following SECTRAL or diacetol doses of up to 240 to 1000 mg/kg/day, respectively.

Pregnancy: Teratogenic Effects: Pregnancy Category B: No teratogenic effects were seen in rat or rabbit reproduction studies utilizing SECTRAL doses that were, respectively, approximately 21 and 10 times the recommended human dose. At this dose in the rabbit, slight fetal growth retardation was noted; this was considered to be a result of maternal toxicity (evidenced by reduced food intake, lowered rate of body weight gain, mortality). Diacetol doses (up to 450 mg/kg/d in rabbits and up to 1800 mg/kg/d in rats) showed no evidence of fetal harm overall, but a significant elevation in postimplantation loss with 450 mg/kg/d, a level at which food consumption and body weight gain were reduced in rabbit dams, there was a nonstatistically significant increase in incidence of bilateral cataract in rat fetuses from dams treated with 1200 mg/kg/d. Therefore, controlled trials in pregnant women; SECTRAL should be used during pregnancy only if potential benefit justifies risk to the fetus.

Nonteratogenic Effects: Human studies indicate that acetolol and diacetol cross the placenta. Neonates of mothers who received acetolol during pregnancy have reduced birth weight, decreased body length, and decreased heart rate.

Labor and Delivery: Effect on labor and delivery in pregnant women is not shown. Animal studies have shown no effect of SECTRAL on the usual course of labor and delivery.

Nursing Mothers: Acetolol and diacetol appear in breast milk (milk/plasma ratio of 1:2 and 1:2, respectively). Use in nursing mothers is not recommended.

Pediatric Use: Safety and effectiveness in children have not been established.

ADVERSE REACTIONS: SECTRAL is well tolerated in properly selected patients. Most adverse effects have been mild, not related to therapy, and tended to decrease as treatment duration increased.

Resp: Atresia of the post nasal sinuses (4%) and sinusitis (2%).

Other: Altered taste perception (4%), taste disturbances (2%), mouth discomfort (2%)

Symptoms and ANA titers were reversible upon discontinuation of SECTRAL.
