### Correction

Errors in dosing values appeared in "Myxedema Coma in the Elderly," by Cynthia G. Olsen, which was published in the September-October issue of the *Journal* (JABFP 1995; 8:376-83). We offer the following corrections:

Page 377: left-hand column, second full paragraph, line 4:

"She received intravenous hydrocortisone, 75 mg every 6 hours. An initial bolus of 400  $\mu$ g of synthetic thyroxine was followed by 200  $\mu$ g on day 2 and 100  $\mu$ g daily thereafter. She received treatment of her heart failure with diuretics, supplemental oxygen and potassium, and digoxin. On day 5 she was switched to oral medications of prednisone 10 mg, levothyroxine 125  $\mu$ g, digoxin 2.5 mg, and indapamide 2.5 mg."

Page 381: left-hand column, second full paragraph, line 12:

". . . dose of 250 to 500  $\mu$ g for a 30- to 60-second period."

Page 381: left-hand column, third full paragraph, line 6:

". . . dosing in a range of 100 to 170  $\mu$ g daily."
